High temperature and intense turbulence within the Venturi Chamber causes:

- a) Complete solution of starch in water.
- b) Intimate mixing of starch and oil components.
- c) Shear-induced lowering of starch molecular weight.

FIG-1

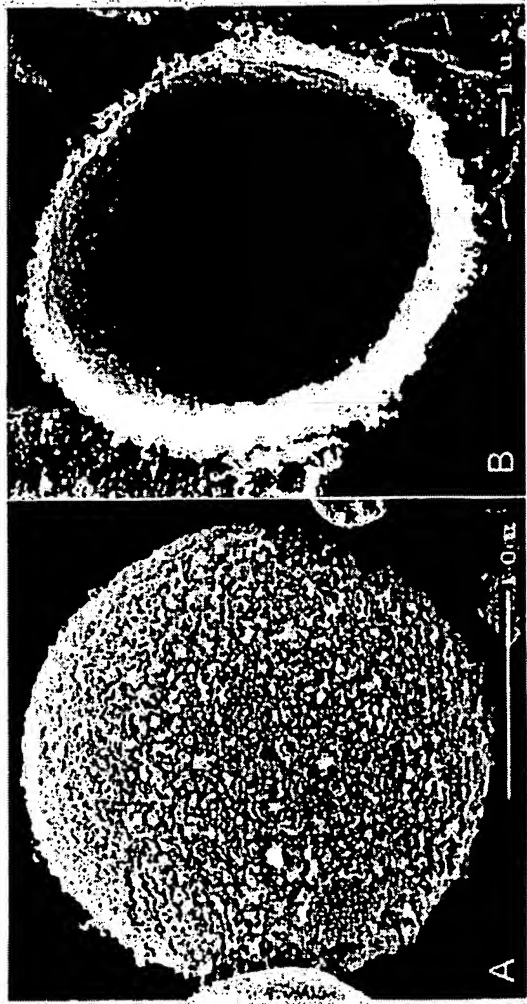

Figure 2. Scanning electron micrograph of starch spheres isolated from diluted Fantesk made with cornstarch and soybean oil. Starch was fixed with ethanol which dissolved away the included oil. A, intact sphere; B, broken sphere showing contrast between rough exterior and smooth interior.
